EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to the applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with William Conley (Registration No. 55844) on May 16, 2006.
3. The application has been amended as follows:
 - a. Claim 5, line 3, the phrase "the addition" has been replaced with the following --addition--.
 - b. Claim 8, line 3, the phrase "the deletion" has been replaced with the following --deletion--.
 - c. Claim 17, line 5, the phrase "the addition" has been replaced with the following --addition--.
 - d. Claim 20, line 5, the phrase "the deletion" has been replaced with the following --deletion--.
 - e. Claim 24, line 15, the phrase "the addition" has been replaced with the following --addition--.
4. Claims 1 – 24 are allowed over the prior art of record.
5. The following is an examiner's statement of reasons for allowance:

a. Regarding claims 1 and 13, while Dixon, Buschmann and Tanenbaum teach a method and a computer-based apparatus for accommodating interaction phenomena in a data-flow-based simulation of a system of elements, none of these references taken either alone or in combination with the prior art of record teach a method and a computer-based apparatus for accommodating interaction phenomena in a data-flow-based simulation of a system of elements specifically including: a plurality of world modules associated with respective ones of one or more interaction phenomena such that each of the plurality of world modules is associated with a proxy module from each meta-module of a group of the plurality of meta-modules, the group being associated with one of the one or more interaction phenomena; in combination with the remaining elements and features of the claimed invention. It is for these reasons that the Applicant's invention defines over the prior art of record.

b. Regarding claim 24, while Dixon, Buschmann and Tanenbaum teach a method for accommodating interaction phenomena in a data-flow-based simulation of a system of elements, none of these references taken either alone or in combination with the prior art of record teach a method for accommodating interaction phenomena in a data-flow-based simulation of a system of elements specifically including: establishing a world module for each of the plurality of interaction phenomena; and establishing an association between the world module and a proxy module associated with each of one or more elements of the system of elements which have an association with an interaction phenomena corresponding to the world module; in combination with the remaining elements and features of the claimed invention. It is for these reasons that the Applicant's invention defines over the prior art of record.
